Subject: Application for Artificial Intelligence/Machine Learning - Summer 2027 Intern

Dear Hiring Manager,

I am writing to express my strong interest in the AI/ML Summer 2027 Intern position at Honeywell. Currently pursuing my M.Tech in Data Science at Rajiv Gandhi Institute of Technology (RIT), Kottayam, with an expected graduation in 2027, I am eager to apply my technical background in predictive modeling, natural language processing, and local AI agent deployment to Honeywell's innovative industrial solutions.

My technical experience aligns directly with the core requirements of this role:

- **Machine Learning & Modeling:** Proficient in Python, SQL, and key frameworks including TensorFlow, PyTorch, and Scikit-learn to design, train, and evaluate machine learning models.
- **NLP & Generative AI:** Experienced in building natural language processing pipelines and working with multi-agent frameworks, retrieval-augmented generation (GraphRAG), and open-source local LLM fine-tuning using QLoRA.
- **Deployment & Analysis:** Skilled in developing interactive user interfaces using Streamlit, visualizing insights with Power BI, and implementing real-time computer vision models using OpenCV.

I am particularly drawn to Honeywell's work in software-driven automation and industrial AI, especially through platforms like Honeywell Forge. I am a quick learner and a collaborative team player eager to support your data engineering and AI initiatives with practical solutions.

Thank you for your time and consideration. I have attached my resume for your review and look forward to the opportunity to discuss how my background and skills can contribute to Honeywell's engineering team.

Sincerely,

Swathi P.
